

TRADELINK Leading Manufacturer in Southern Africa

At Tradelink we are committed to creating value and sustainability throughout our manufacturing process. From sourcing of cotton to delivery of our garments we constantly monitor and improve processes that enhance our Southern African value chain.

- Our cotton is currently 100% South African. We do, however, source from our neighbouring African countries from time to time.
- Our 100% cotton yarn is subjected to stringent tests to ensure the highest quality yarn.
- Our fabric is knitted in body size tubular form allowing for seamless-side products.
- We also produce wide width fabric for our golf, junior and winter product ranges as well as special customer orders.
- Our fabric is dyed to international colour fastness and performance benchmarks to ensure stability.
- Our state-of-the-art Bierrebi automatic cutting machines are used to ensure fast and accurate cutting of garments.
- At our assembly operations in South Africa and Lesotho, garments are manufactured according to the highest standards.
